

First BTF Users' Workshop

Dear colleagues,
we are happy to announce the First BTF Users' Workshop, to be held in the LNF – Frascati National Laboratory, on the **6th** and **7th** **May 2014**.

This will be the occasion for:

- ◆ **Celebrate** more than 10 years of operation of our facility;
- ◆ **Review** the history and improvements of the BTF beam line, infrastructure and diagnostics;
- ◆ **Summarize** the main applications and scientific results obtained by the users with BTF beam;
- ◆ **Discuss** with the users community for the future of the facility, both in the short and in the medium-long term.

A preliminary agenda of the sessions is already set-up in the Workshop web page:

<http://agenda.infn.it/event/btf2014>

We warmly encourage you to submit an abstract for a contribution in one of the three sessions. In particular BTF users are welcome to report on the results achieved and/or on the future needs of their experiments. We also ask you to register to the Workshop, in order to arrange all the logistic details.

We look forward for hosting you all in the Frascati Lab. Thank you, kind regards

Paolo Valente, Bruno Buonomo, Luca Foggetta
