

Heavy Quarks and Leptons (HQL10)

October 11-15, 2010

INFN – Laboratori Nazionali di Frascati, Italy

First Bulletin

The Xth International Conference on Heavy Quarks and Leptons, continues the tradition of regular scientific meetings, first started in 1993 at the Laboratori Nazionali di Frascati in Rome, Italy, under the name "Heavy Quarks at Fixed Target". In 2002 the scope was widened to include leptons with the workshop renamed to what is known as today. This workshop is dedicated to the study of the heavy quarks, namely charm, bottom and top, with obvious extensions to interesting topics involving the strange quark. Neutrino oscillation studies and new insights in mu and tau lepton phenomenology are also included. A poster session will be part of the conference, those interested in contributing a poster should send an abstract by filling the Abstract Submission form available on the web page <http://www.inf.infn.it/conference/hql10/>.
