**Controlling large systems
apparatus in an effective manner
using the thin client technology**

Paolo Sestini

System Engineer

paolo.sestini@sun.com

Agenda

- Overview
- Technology Evolution
- Hot Desk Technology
- SunRay and WinXX integration

The needs

Provide a cost effective tool to deploy applications/services to the end-users exploiting the ease of use of the Graphical User Interfaces.

The Sun Ray Hot Desk Architecture

Everything Managed Centrally!

Technology

- Hot Desk Technology
- Sun Ray Enterprise Appliances
- Sun Ray Enterprise Server Software
- Application Interoperability

Hot Desk Technology

What is it?

- The technology underlying the Sun Ray Hot Desk architecture
- Components
 - Server software which instantly maps users' computing sessions to appliances
 - A low-cost, high quality of service interface used to communicate between server and appliance
 - Smart card access

How it Works

Citrix

Sun Ray Enterprise Appliances Family

Sun Ray 1

- SPARC CPU
- 1280 x 1024 x 24 frame buffer
- 10/100Mb Ethernet
- Access to Solaris Operating Environment, Java technology-based, Microsoft Windows NT applications
- Rich multimedia capabilities
- Smart card reader
- USB support (4 ports)
- 5 years warranty

Never needs to be upgraded!

Sun Ray 100

ALL-IN-ONE design

- Same configuration as Sun Ray 1
- Integrated in a 17" CRT monitor
 - 1280x1024 @ 75 Hz, .26 dot pitch

Never needs to be upgraded!

Sun Ray 150

ALL-IN-ONE design

- Same configuration as Sun Ray 1
- Integrated in a 15" TFT monitor
 - 1024 x 768 @ 60 Hz
- Projector port

Never needs to be upgraded!

Smart Card

- Enables session mobility
 - Session follows unique smart card token
- Multiple policies supported
 - Self registering cards
 - Pre-registered cards only
 - Cardless operation
- Smart cards available through SunStoreSM services/Solaris ready and allies

Mobility

- Since version 1.3 of SunRay Enterprise Server Software, mobility is extended to non SmartCard users
 - Relies on session lock to map session to the right SunRay appliance

Unique Badge

- Official Employee Badge
- Building Access
- Access to Sun Ray

- Official Employee Badge
- Building Access
- Standard Credit Card
- Digital Certificates
- Calling Card

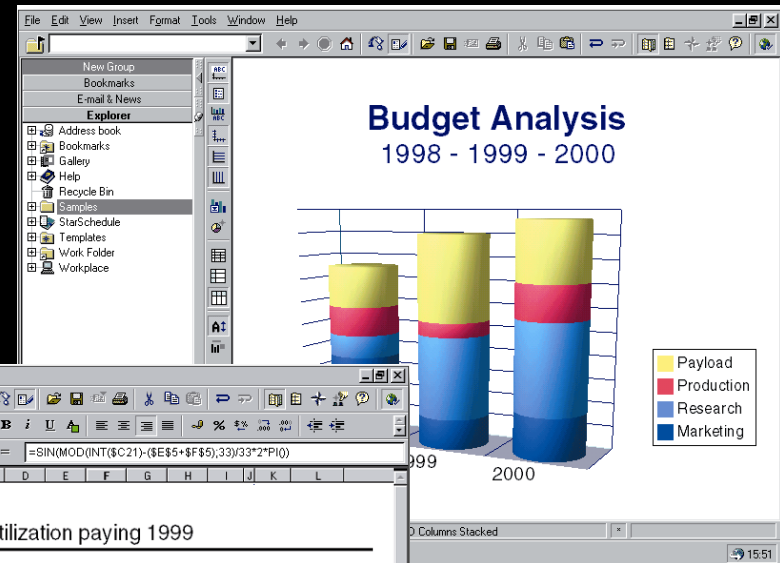

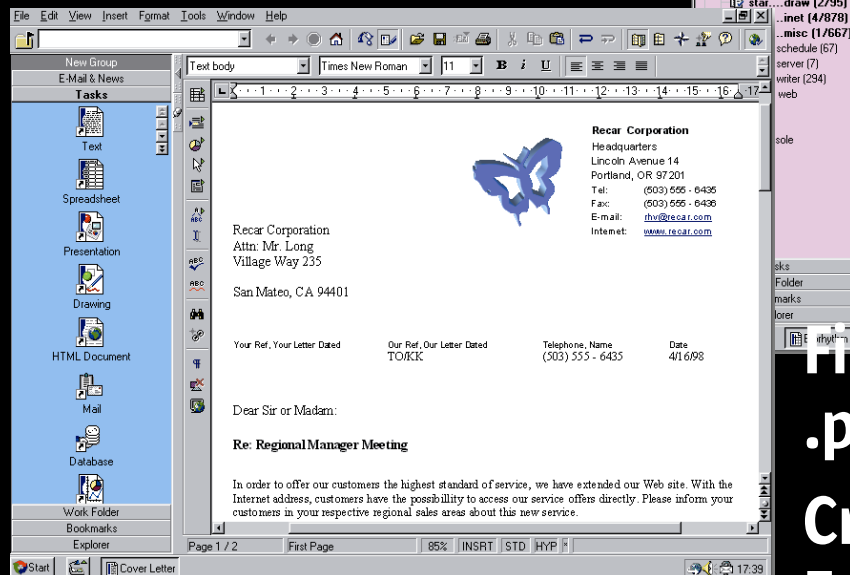

Applications and Interoperability

StarOffice Software

Download Free! No software license fees

Support, subscriptions, and media kits available from Sun

Full featured, fully integrated office suite

File format compatible: .doc, .xls, .ppt

Cross platform: Solaris Operating Environment, Microsoft Windows, Linux, OS/2

Available Media Players

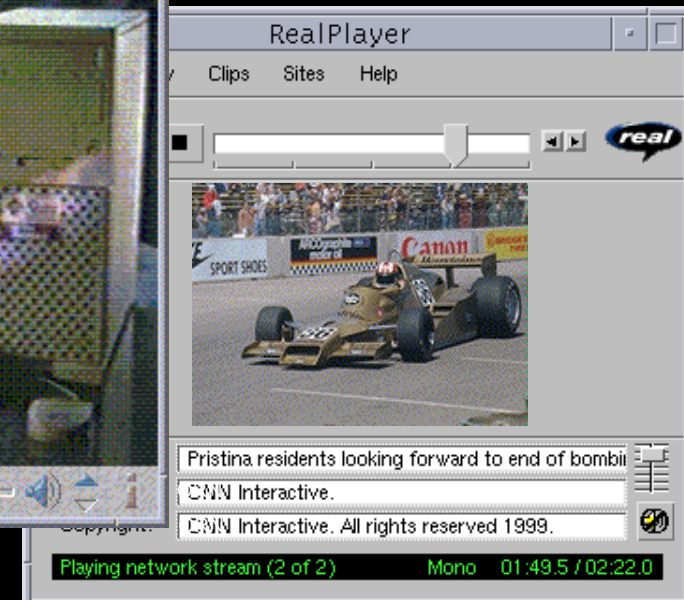

ShowMe TV 1.3

Java Media Player

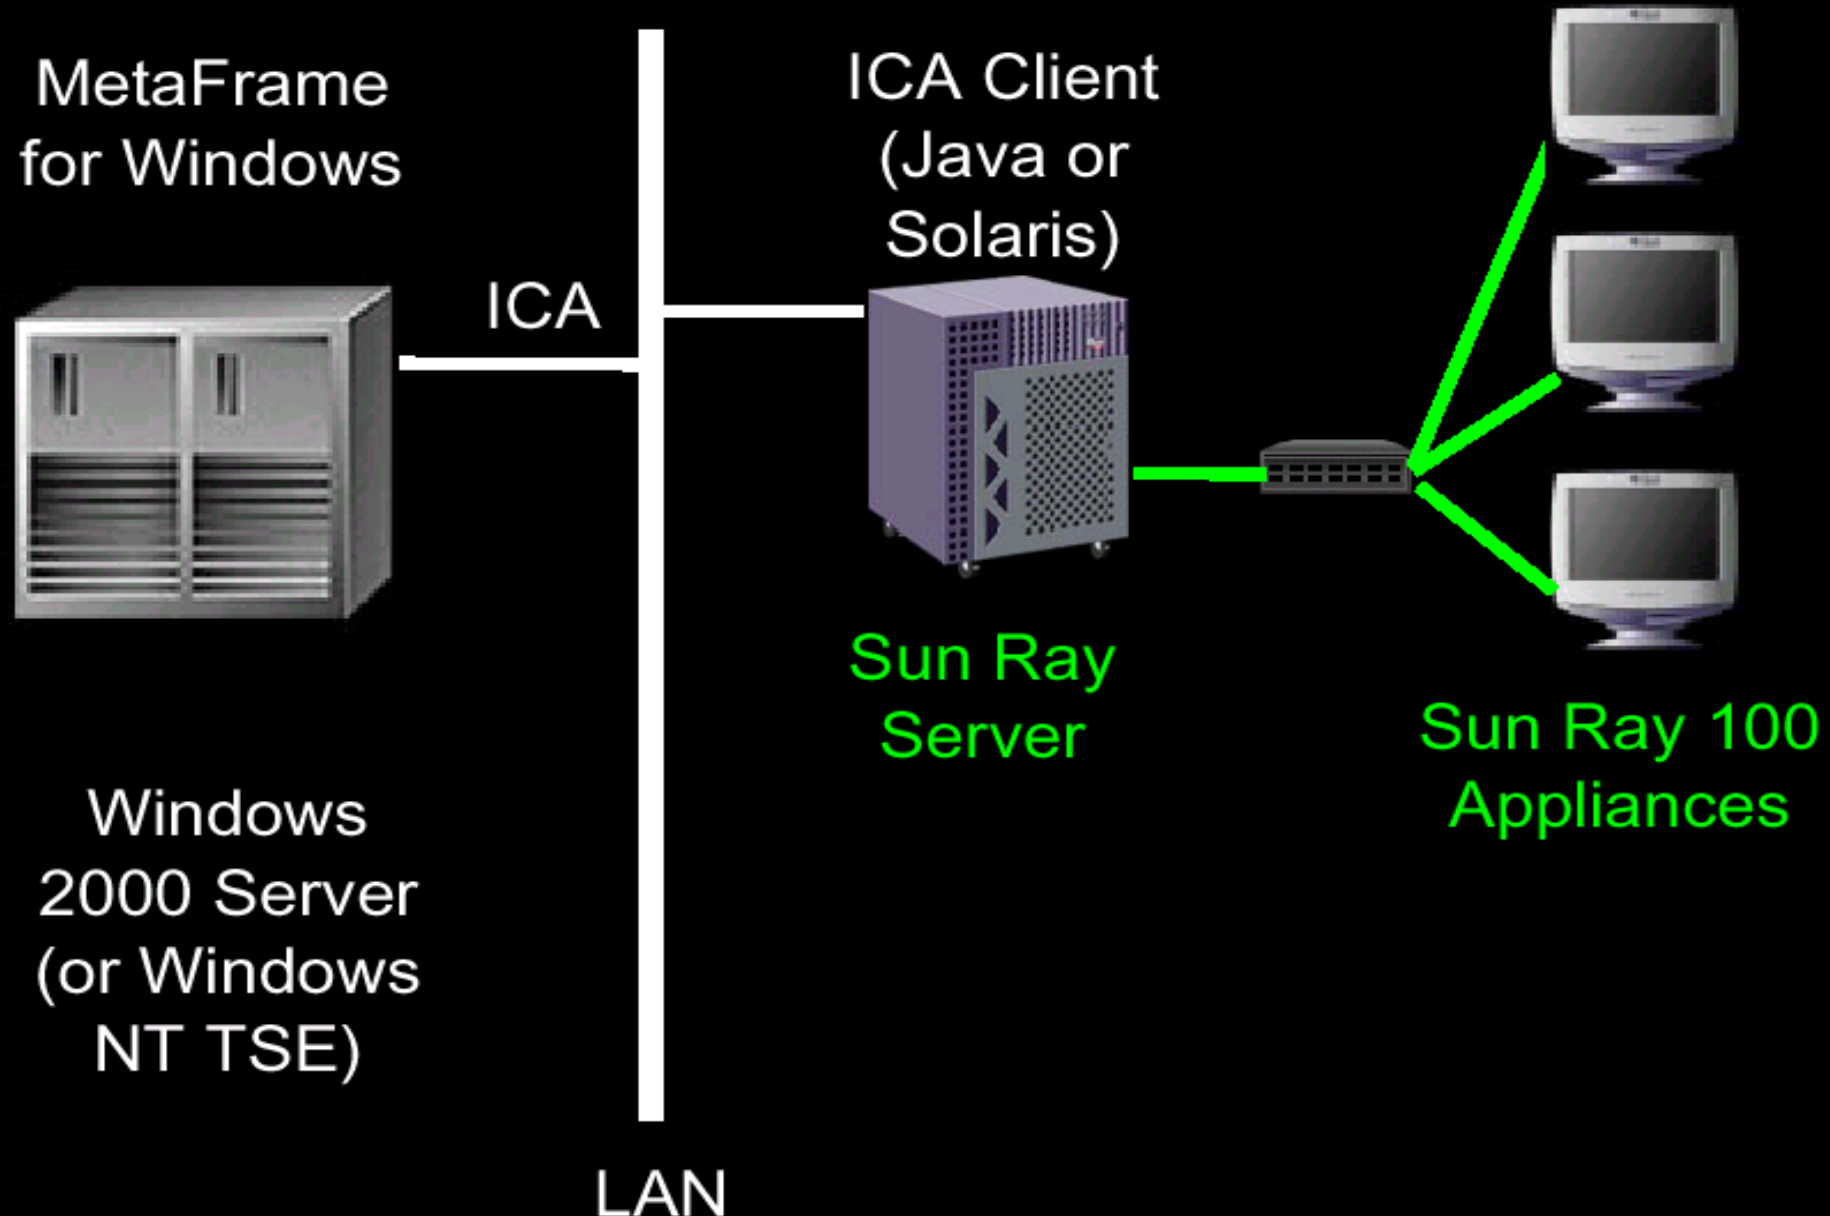

RealNetworks'
RealPlayer

SunRay and WinXX integration

- Citrix Metaframe
- SCO Tarantella
- HOB HOBLink
- SunPci II Pro

Citrix Metaframe

SCO Tarantella

Competition

Sun Ray Enterprise Appliances vs. Today's Clients

	Sun Ray	WBT	X-Terminal	PC
Plug and Work	Yes	No	No	No
Session Mobility	Yes	No	No	No
Display Rendering	Centralized	Local	Local	Local
O/S	Centralized	Local/Central	Local	Local
Full Multimedia	Standard	Requires Card	Requires Card	Requires Card

Key Differentiators vs. PCs, WBTs and X-Terminals

- Hot Desking
- No-upgrade appliance
- Solaris Operating Environment RAS
- Power of the server on your desktop

Sun Ray Hot Desk Architecture Summary

User Experience

- Instant
- Constant
- Simple
- Rich

IT Experience

- Centrally managed
- Low cost
- Interoperable
- Reliable
- Secure
- Scalable

The Appliance Architecture for the Service Driven Network
