

Probing Strangeness in Hard Processes

Laboratori Nazionali di Frascati

October 18-21, 2010

Topics:

- Nucleon tomography and quark orbital angular momentum - GPDs and TMDs
- Strange distribution and fragmentation functions
- Quark hadronization in the nuclear medium
- Hadron spectroscopy and exotic mesons
- Advances in RICH technologies

Local Organizing Committee

E. Cisbani (ISS & INFN-RM1)
M. Contalbrigo (INFN-FE)
U. D'Alesio (University & INFN-CA)
R. De Leo (University & INFN-BA)
P. Di Nezza (INFN-LNF)
D. Hasch (INFN-LNF)
M. Mirazita (INFN-LNF)
M. Osipenko (INFN-GE)
P. Rossi (INFN-LNF)

International Advisory Committee

H. Avakian (JLab, USA)
