The DAΦNE ϕ -FACTORY at FRASCATI: Collider Project and Physics Program

F. L. Fabbri

Laboratori Nazionali di Frascati dell'INFN, P.O.Box 13, I-00044 Frascati (Rome) Italy

Abstract

The DAΦNE ϕ -Factory expected to be operational at the Frascati Laboratory will offer a unique opportunity to clarify many questions on kaon physics remained open for more than 30 years: CP and CPT nonconservation, hypernucleus production and decays, kaonic hydrogen puzzle, kaon rare decays, kaon nucleon scattering length, and others.

ANNULLATA/CANCELLED

PACS N.: 11.10.Ly
