

Acknowledgments ¹

The Editors are grateful to all the Staff of the Frascati National Laboratories, for their unconditioned support to this project. In particular, we thank Cristina D'Amato, for her unvaluable help as secretary of the DAΦNE working group through our 3 year efforts, Giovanni Nicoletti for his help with the art work, photographs and maps, Silvia Colasanti for helping with the postscript files. The credit for the cover picture (and most other pictures in the paper version) goes to the Laboratorio Fotografico, whose members we gratefully thank. Finally we thank Luigina Invidia, who is setting the paper version of this Handbook, for her professional assistance throughout our work.

We thank our colleague Vincenzo Valente, head of the LNF Publication Service, for his enthusiastic and unwavering collaboration and patience in providing us with photographs, technical support and advice at each stage of this endeavour. Thanks are also due to the young people of the Frascati theory group, in particular M. Finkemeier and M. Nowakowski, who helped at various stages.

Finally, we express our gratitude to Carlos Pietrafida, EEC fellow from LURE, for his continuous and precious help in the preparation of the electronic version of this Handbook: thanks to his expertise our book has been made available to the Web community.

The Editors

Luciano Maiani, Giulia Pancheri and Nello Paver
