INSTRUCTIONS FOR CAMERA READY PAPER

AUTHOR NAME

AFFILIATION
address of institute

Abstract

The proceeding of this Workshop, edited by F. Giovannelli and G. Mannocchi, will be published by the Societa' Italiana di Fisica in the special series of Conference Proceedings. In order to have all contributions in the same format and to ensure a uniform presentation we ask to respect the instructions here reported.

1 Introduction

The deadline for receipt of the camera ready contributions is July 15, [1]. They should be sent to:

Franco Giovannelli
Istituto di Astrofisica Spaziale, CNR
Area della Ricerca di Roma
via Fosso del Cavaliere 100
I-00133 Roma
(Italy)

[1] This is a footnote

2 Camera ready Paper Instructions

The original typescript of the full text of each contribution will go directly to the photografic reproduction service **without any editing**, and should therefore be in its final form and of good appearance. Xerox and similar form of photocopy do not reproduce shape well, and will not be accepted.
a) The text must be either typed or printed with a laser printer on a regular white paper following the light-blu guide frame here enclosed (15.5×24.0 cm). Fill the frame completely from top to bottom, starting immediately below the blue line. Do not start a new section on a new page, but continue on the same sheet of paper.
b) Please, keep spacing 1 between text lines. Remember that the text will be reduced to 81%, and therefore **you must use a font size = 12**.
c) references must be put in alphabetical order, with all the authors, and in the text they must be quoted as, for instance, Smith et al. (1990) or Smith and Wesson (1910) or (Smith et al, 1985).

Following the experience of the past workshops, we have to remark that the authors did not obey to the instructions, so that the papers were printed in a free-format way. **This is not good!**

We strongly recommeded to use the available LaTeX macro to edit the paper. This documents is an example obtained by means of this macro. This can be received via e-mail upon request to the following address: vulcano@saturn.ias.fra.cnr.it

3 Title

The title should appear in CAPITAL LETTERS of the same character size as in the text, without underlining, and centered across the correspondent frame of the first page of the paper. Type author(s) name(s) and affiliation in Capital and lower case letteres centered under the title in the proper frames.

4 Formulae

They should be typed centered and when numbering formulae, enclose number in parentheses and align on the right-hand margin. This is automatically ensured by the proper use of the LaTeX commands, as in the following example, where the eq. 1 is displayed:

$$s_1 = \frac{3 \cdot t_1}{t_1 + C_3 \cdot \beta} \tag{1}$$

5 Figures

Only original drawings or good glossy prints are well reproduced. Do not use free-handed lettering for labelling figures. Figures should be numbered through the text (arabic numbers) aand should have a caption centred below the figure. The figures should be placed as close as possible to the text wwhere they are discussed. Only if it is impossible place the figures at the end of the paper. In the case of photographs, only black and white copies can be accepted.

When using LaTeX figures coded in Encapsulated Postscript can be easily inserted in the text, as in the example of fig. 1. Otherwise a proper space can be inserted in the text using the "vspace" command.

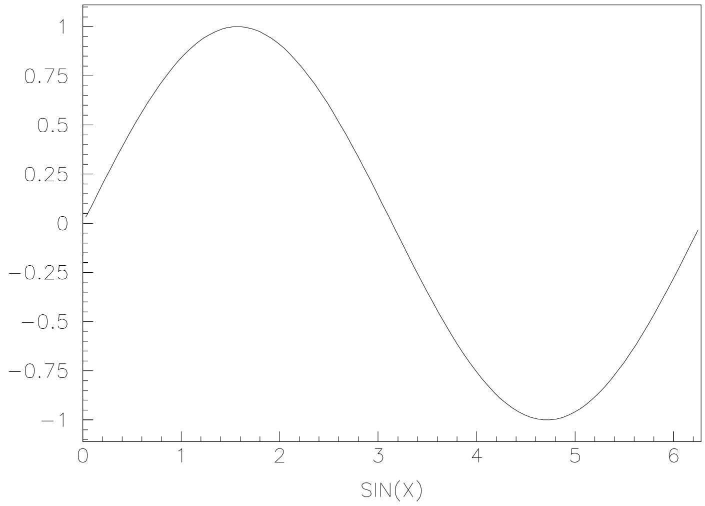

Figure 1: *Example of figure with caption.*

6 Tables

They should be put in the text, numbered with arabic numbers and with a caption typed below them. Here is an example where Table 1, fully described in the LaTeX macro, is displayed.

Secondary	C_1	C_2	C_3	C_4	C_5	C_6
e^+e^-	.33499	-.73003	1.4908	.3046	1.3639	1.7703
γ	1.169	-.34014	1.7893	-.076683	1.0986	1.5324

Table 1: *Example of table*

7 Lenght of the papers

The maximum lenght for the papers is the following:

- 12 pages for the talks $\geq$ 30 minutes.
- 8 pages for the talks $<$ 30 minutes.

8 Deadline

Please remember: the dead line is July 15th, 2000.
